- ## what is moissanite jewelry?

Moissanite jewelry is jewelry made with moissanite gemstones, a beautiful and sparkling stone created in a laboratory. It looks very similar to a diamond but is more affordable and very brilliant.

Moissanite was first discovered by the French scientist Henri Moissan in 1893 inside a meteor crater. Today, natural moissanite is extremely rare, so the stones used in jewelry are lab-created.

Key Features of Moissanite Jewelry

✨ Brilliant Sparkle – Moissanite reflects light strongly, often shining even more than diamonds.
Affordable – It costs much less than natural diamonds.
Durable – With a hardness of about 9.25 on the Mohs scale, it is suitable for everyday wear.
Ethical & Eco-friendly – Lab-created, so it avoids mining issues.
